Roadmap

01

Scope and vision

**IDOWALL** is on a mission to provide blockchain enthusiasts with access to hundreds of IDO and Pre-Sale listings of Native Cardano Tokens, from multiple launchpads displaying advanced metrics & comparison tools in a simple yet concise interface.

- We are on a mission to simplify and accelerate the cardano ecosystem and at the same time give users an indepth look at any cardano IDO Project.
- When fully Launched, IDOWALL will provide a safe platform for any user to research, manage, and quantify their current and future IDO (Initial Dex Offerings) and Token Presales on the cardano ecosystem.
- This whitepaper provides a detailed description of the use-case, tokenomics and the future development plan of **IDOWALL** and its utility token (**\$WALL**).

02

Introduction

We saw a meteoric rise of De-FI Applications and the huge adoption of Altcoins which means that the Defi Industry is showing good prospects and with this, the term IDO is being used every now and then in the Crypto Space.

Which Brings The Question

### What is an IDO?

In Simple terms, IDO represents Initial DEX Offering. This new fund raising model has reflected a tectonic shift on how token crowdsale patterns have changed over time in terms of offering better liquidity for crypto assets and faster, more open fair trading.

Token public sales or ICOs as they were initially called have evolved over the last four years to The IDO model itself being the successor of fundraising methods for crypto projects.

03

Problem

Participating in an ICO these days is quite risky for an experienced cryptocurrency investor and for a newbie? well chances are that you might get rugpulled as the downside of decentralization is that anyone can create a token for just a few bucks and launch a presale to later dump the project and leave investors with worthless tokens.

On The other hand IDO or IEOs can be lucrative most times for an investor, but certain times it can be quite cumbersome searching for the new X100 Coin.

An investor trying to DYOR on a potential crypto gem will have to go through rigorous yet strenuous methods of checking the validity of a project which might include but not limited to checking the project's twitter, telegram, discord and so forth.

While this method has proven to come handy while performing a DYOR, it has a lot of limitations as the frantic nature of IDOs will make it even harder for an investor to focus on the metrics that matter as the investor will have to perform a whole lot of due diligence checks and research to ensure the legitimacy of a project.

04

S o l u t i o n

With IDOWALL, Your all-in-one suite of holistic Cardano Native Token IDO analysis tools for potential investors to reduce investment risks and increase the likelihood of participation in lucrative IDOS.

With IDOWALL platform, you can view presales from Cardano launchpads like cardstarter & Kick.io, having a graphical representation of crucial information about each Cardano Native Asset like Token Policy ID, Team DOX Status / KYC, Total Supply and So On.

Our AI bots detect new pre-sales on different Cardano IDO platforms every hour automatically, from supported launchpads and displays them on a single interface with relevant Metrics, cutting down the rigorous stress that a potential investor needs to go through to find the next X100 Cardano Gem.

05

\$Wall Token

- **\$WALL holders can also be able to endorse a new cardano IDO project by a voting process which will require staking your \$WALL tokens in favor of a project**
- **\$WALL is the utility token built on the Cardano Blockchain That will power the IDOwall Ecosystem, Wall Token will be Used As a subscription token to access our IDOWALL platform.**
- **HOLDERS of \$WALL token will enjoy passive income as they can be able to stake their token to FARM ADA or Earn More WALL or Both.**
- **To access the IDO analytical tools, IDOWALL provides multiple tiers of services, with the most advanced IDO analytics features available exclusively for \$WALL token holders**
- **Features like advanced pre-sale filtering options, multiple added-value metrics, dark mode, presale saving are restricted to only a certain amount of wall holders who have a certain minimum balance of the utility token \$WALL.**

06

IDOWALL  
Features

**View Token presales from multiple launchpads.**

**View crucial information about each pre-sale like Token Policy ID, Team DOX Status / KYC, Total Supply project description and so on.**

**Hold our utility token \$WALL to break the barriers and have access to IDOWALL Pro, and all its amazing features.**

**\$WALL Token Holders can earn passive income by staking their \$WALL tokens to earn more.**

07

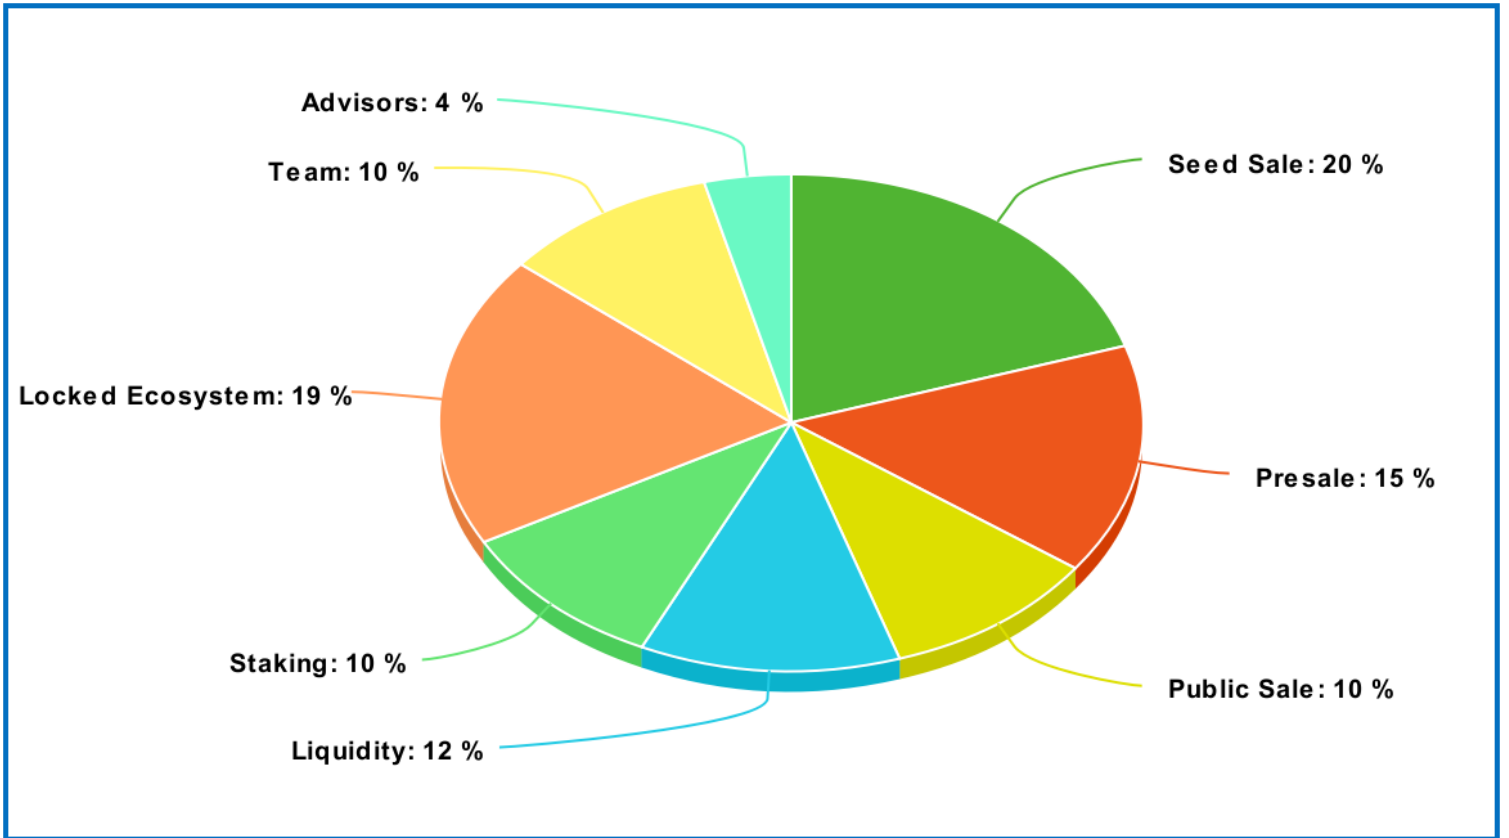

IDOWALL  
Tokenomics

**Total Supply:**  
10,000,000

**Blockchain:**  
Cardano (ADA)

**Token Name:**  
IDOWALL

**Token Ticker:**  
WALL

meta-chart.com

\$WALL SALE ROUNDS

SEED SALE: 2,000,000

PRESALE: 1,500,000

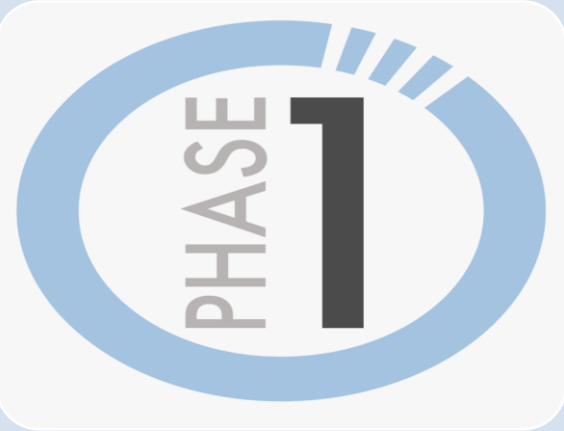

PUBLIC SALE: 1,000,000
